DESCRIPTION <i>Unique characteristics</i>	Excellent short growth variety for dryer areas	Shows tolerance against Fusarium head blight (FHB) and crown rot	High and stable yield potential with excellent yellow rust tolerance	Tolerance against fusarium head blight. Sets the standards for quality in the Western Cape	Excellent yellow rust tolerance with average tolerance against leaf and stem rust	High and stable yield potential with excellent tolerance against yellow rust	High and stable yield potential. New long growth season variety with excellent tolerance against yellow rust
<i>Area adaptability</i>	Entire Western Cape	Entire Western Cape	Entire Western Cape	Entire Western Cape	Entire Western Cape	Entire Western Cape	Ruens area and other areas where SST 88 performed well
<i>Supporting cultivar/s for obtaining a resilient harvest</i>	SST 0166	SST 0187	SST 0187 and SST 0208	SST 0166	SST 0166	SST 0166 and SST 0208	SST 0166 and SST 0187
<i>Planting window including supporting cultivar/s</i>	Early to late	Early to late	Early to late	Early to mid-season	Early to mid-season	Early to mid-season	Early to mid-season
AGRONOMIC CHARACTERISTICS <i>Harvesting characteristics</i>	Excellent shattering and sprouting resistance	Excellent sprouting resistance	Excellent sprouting resistance	Excellent sprouting resistance	Excellent sprouting resistance	Excellent shattering and sprouting resistance	Excellent shattering and sprouting resistance
DISEASE TOLERANCE* <i>Leave rust</i>	S	MS	MS	MS	MR	MR	MR
<i>Stripe rust</i>	MS	MR	R	MR	R	R	R
<i>Stem rust</i>	S	MS	MS	S	MR	Mr	MR

*Disease indicator: **S** Susceptible | **MS** Medium Susceptible | **MR** Medium Resistant | **R** Resistant
